ATTACHMENT "D"
March Monthly Report 2015

It's been a long hard winter. Salt usage was over 800 tons this season. 10,000 gallons of brine was processed and applied to our roadways. Maintaining and washing trucks after each storm seemed endless and is still ongoing.

We have been repairing county and borough street pot holes every day this month. The county provided us with 8 tons of material and we purchased 12. Oak St. is the costliest; the road base has been compromised and is in desperate need of repair.

Many storm drains had to be fixed as well as many curb boxes that were damaged during plowing operations.

Sections of speed bumps at Briarwood Avenue and at 14th St. had to be repaired that were damaged from private contractors plowing out driveways.

The triplex has kept us busy with multiple problems. The main sanitary sewer line was blocked in the center of the building. The police dept. sink and urinal was not working and the DPW floor drains backed up. The floor drains took three days to repair a clogged pipe outside the building. This pipe had no clean out access and had to be dug up by hand to repair. The community center woman's toilet was broken (vandalism) and was replaced.

A couple of wind damaged flags were replaced at borough hall and the monument flag pole.

Litter is on the rise. Extra time has been spent removing advertising signs, roadside litter and garbage.

The batting cage entry card system is not complete. Due to the bad weather we have not been given the opportunity to install the wireless connection antennas.

The remainder of the Livingston St. scape signage was installed; nine banner arms have been replaced, mostly at the intersection. Twelve flower pot inserts were ordered including 55 hanging baskets with flowers.

Our Lightning detection systems will be added to the first of the month inspections. All inspections have been completed and documented for March.

E waste pick-up was done Wednesday 3/18. At this time electronics are being stored on the DPW parking area, keeping the future garage site clear for construction.

Showmobile can only be set up and transferred by class A CDL drivers only. We have only two operators with that class license. These two were sent for mandatory training for the showmobile at Van Sawn Park so that we may use this trailer when needed.

The library fire suppression system has been setting off the fire alarm. A bad tamper valve must be replaced as soon as possible. My first quote was over 5,000. Thru further research I found we can do this for \$475.00. This fire system is 27 years old and will soon need more work.

The last couple days of this month we began fall clean ups at our buildings, parks, soccer and baseball fields.

Road sweeping will begin in April. Operator training for our new sweeper has been scheduled.

I received a letter from Jimmy Smith acknowledging his retirement in mid-April. His many years of dedication, experience and professionalism will be missed. He truly was an asset to Norwood.

Monthly Safety Report

There were no injuries reported this quarter.

We begin the day with "tool box" talks as a reminder for the job application we are performing that day including entering and exiting vehicle's, lifting and slip and fall safe practices.

We have been doing on-site job observations looking for hazards before beginning a job and what safety equipment is necessary before beginning work.

This quarter we watched two safety videos. The men watched "The Importance of Safety" and "Accidents it can happen to me"

We had our aerial truck dielectrically tested with 100,000 volts by the manufacturer ensuring the bucket and boom is safe from age cracks and damage.

Reviewing our loss control report for the Kennedy Park playground, we trimmed all low hanging branches inside the playground to prevent injuries and or safety violations.

All employees at the public works have been trained for fork lift recertification. Next recertification due 2019.

The speed traffic light control at Tappan Rd. has been repaired to reduce speed during school crossing guard hours. Age and corrosion caused the failure.

All Borough buildings and DPW trucks fire extinguishers were inspected/certified by North East fire and safety. Till next year each first of the month they are visually inspected by us and documented.

Safety Director Bulletins are also distributed to our personnel or posted on the bulletin board. I left you an MSI copy FYI

March 2015

Safety when Collecting Brush on Roadways

Spring time means spring cleaning and many agencies begin with branch and brush clean-up operations. Now is a good time to review your policies and practices for collecting brush along public roads.

There are two common practices for collecting brush; chippers and front-end loaders with a claw attachment. Each presents hazards, some common, such as working on streets that are open to traffic, and others specific to the equipment being used.

Traffic Hazards

Collecting brush is considered a Mobile Work Zone. The minimum requirements are high intensity amber warning lights that can be seen by vehicles approaching from either the front or rear of the crew, and workers wearing ANSI Class 2 high-visibility outer wear. Be alert for obstructions to the amber lights being visible due to raised beds, equipment, or damage. Also, due to the changing weather, retro-reflective outerwear can be a challenge. The temperature change between mornings and afternoon can mean three levels of outwear during the day. Make sure employees have, leave with, and use options that meet the MUTCD requirements.

New Jersey has the most congested roads in the nation. Look for opportunities to go above the minimum safety requirements for crews on the street.

- If crews are collecting brush in a development with one or two entrances, consider placing warning signs at the entrance(s).
- While most brush piles can safely be collected with the crew assigned, consider assigning a trailing vehicle or flaggers for difficult locations.
- Schedule collections for areas around schools when school is in session and bus / pick-up / drop-off traffic is minimal. Likewise, schedule collections along commuter routes after and before times of heavy traffic.

New Jersey public agencies have experienced a significant number of fatalities / injuries and near misses when a vehicle approaching from behind the crew have been distracted or blinded from the sun and ran into the rear work vehicle. Workers must be aware that motorists are distracted, blinded, rushed or inexperienced and the workers must watch their back and the backs of each other.

Do not forget the hazard of the work vehicles moving from stop to stop. Nationally, half of work zone fatalities are from workers being struck by their own work vehicles. There is a simple rule to avoid these incidents: **Drivers must not move a vehicle unless every worker can be seen, either directly or in mirrors.**

Ergonomic Hazards

Regardless of the method of collecting branches and brush, workers will need to handle the vegetation to some extent. Whether with rakes or bending over to pick-up branches, workers will need to be reminded to protect their backs, shoulders, and knees. Sprains and strains are the most common injury to employees.

- Evaluate rake handles. Are they the right length and diameter for workers? Are they in good condition?
- Observe workers as they rake, lift, and carry vegetation. Are they using the proper body mechanics? Take pictures and discuss footing, erect body position when using a rake, locking the lower back in the natural S-curve when lifting, and other concerns.

Chipper Safety

Review the additional safeguards with crews who will be using chippers:

- Review the Owners' Manual and the safety warnings. Make sure a copy is available for reference.
- Review the pre-use inspection procedure. Best practice is to use a form from the manufacturer. Take the crew outside and go through the inspection process with the chipper. Explain the criteria for taking the unit out-of-service for deficiencies.
- Review the proper personal protective equipment that is needed. This should include hardhats, face / eye protection, hearing protection, and foot protection.

Operational best practices include:

- Do not wear loose-fitting clothing or gloves
- Feed branches with the cut end first. Stand to the side and walk away when the branches catch
- Use a tool or other branches to feed small brush into the chipper – never your hands. Very small branches and vegetation can be thrown directly onto the pile of chipped material.
- Follow guidelines for clearing jams. Be aware that knives can free spin for minutes after the machine is turned off. Review Lock Out / Tag Out procedures for various maintenance operations.

Front-end Loader & Claw Safety

For crews using front-end loaders, review the following safeguards:

- There are two significant 'Crush Zones' for workers to be aware of: 1) between the truck / container and the loader, and 2) under the raised claw. It is not enough just for workers on foot to make eye contact with the loader operator. There must be a means, such as hand signals, for more definitive communication on the intent of the worker and operator.
- The operation entails a lot of movement within the work zone by the loader. This places a great responsibility on the operator to check behind, to the sides and front of the loader before EVERY move, checking for people and cars.

Dump-site Safety

Crews must unload the collected vegetation at the end of their assignment. Dump sites can be a dangerous place. There are typically no designated traffic patterns, multiple vehicles at any one time, and workers on foot. Discuss site safety, working around raised containers, and the requirement for high-visibility apparel.
